DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-11, drawn to a hand held massaging device in the form of a main body tool comprising a hand grip with a plurality of finger rings.

Group II, claim(s) 12-20, drawn to a hand held massage tool in the form of a foot tool set comprising a hammer and spatula as interactive implements.

Group III, claim(s) 21-26, drawn to a hand held massage tool in the form of a facial tool comprising an arrowhead point, concave u-bend elements and a rounded crescent-shaped bottom.

The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I involves a hand grip comprising a plurality of individually closed interconnected finger rings such that the tool can only be gripped in a well defined way. it is submitted that the ergonomic hand grip comprises a special technical feature.

Group II involves a hammer and spatula implement to provide a foot massage whereby a focus point is created on the spatula by a lipped ridge that prevents the hammer from slipping off the spatula. It is submitted that the interactive foot tool with interactive surfaces for improving security for a use is a special technical feature.

Art Unit: 3771

Group III involves a facial massage device with a u-bend element having tapered edges to provide an additional massaging surface for massaging the jaw line. It is submitted that the facial tool with the improved versatility is a special technical feature.

The special technical features of groups I-III are neither identical nor corresponding since the features have different effects and solve different problems. Therefore, there are no corresponding special technical features shared by all groups of inventions.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
